Importance: High

All,
Please see note below from Christy Warren, our Houston Lab sample control coordinator.
I would like to add my sincere thank you for Gary's efforts!

Wes McQuiddy
Acting Chief, Environmental Services Branch
U.S. EPA Region 6 (6MD-H)

Subject: CES Environmental

Wes,

The Region 6 Lab worked on a criminal case (CES Environmental) back in 2009. We had all of the remaining sample volumes along with evidence from the site that was collected by CID still stored in our cold room. We received the Lab Sample Destruction Letter from CID in September of this year but had not yet started disposal processes.

As you know, the Region 6 Lab has taken a few samples from Gary Moore to attempt to help him eliminate a few waste codes for his waste streams at CES Environmental. I coordinated with Gary Moore to see if he could take all of our remaining sample volumes and evidence back to the CES site for proper disposal in his waste streams. Gary agreed and came by the lab to pick it up this morning. To give you a visual on the amount of material we are talking about – it filled the bed of his truck.

Please consider sending a thank you to Gary Moore and/or his Section Chief. This saved the Region 6 Lab time & effort as well as money. FYI – This is not the first time Gary has worked with the lab to dispose of remaining sample material. Several years ago the lab analyzed over 1,000 soils for PCBs from the Old Esco site for Gary. He had his contractor pick the samples up from the lab once analysis was complete and return them to the site for disposal.
